Burn to rise. Renew to soar

ABOUT US

Introducing \$PHNX, the resurrected **meme token**. Reborn from the ashes of \$T&B, built in public, to demonstrate that failure* can lead to great successes!

We ambition to **become one of the core meme tokens of the Radix ecosystem** thanks to innovative features and long-term roadmap! We love Radix for its user-friendliness, limitless possibilities, and growing communities.

*T&B token was launched too quickly and did not include any burn feature or other mechanisms that would have made it sustainable over the longer term. Going forward, T&B will be the governance token of \$PHNX.

GOING FORWARD

Because we plan to **become a long-term partner of the Radix ecosystem**, we have ideas for the longer term...

Our core values lie in education and sharing. We ambition to build a project contributing to the sharing of knowledge on crypto and beyond

PROJECT 1

Gaming has not yet made its way in the Radix ecosystem. Let us be the key that will unleash a new experience on Radix!

PROJECT 2

Trading can be fun and friendly. We have ideas to create friendly trading competition on the Radix ecosystem. Learn how to trade and develop new skills!

PROJECT 3

...but we first need visibility, a strong community, and time to fully conceptualise!
